Overview

The IEEE Computer Society's annual MASCOTS conferences have a long and distinguished history in the field of Performance Modeling, Measurement and Analysis of Computer Systems and Networks. The 15th MASCOTS international meeting will be organized by Bogazici University, Istanbul, Turkey, in October of 2007 and we encourage researchers worldwide to submit both theoretically and practically significant results in the field of computer systems performance analysis and evaluation, that have not previously been published. The IEEE Computer Society will publish the conference proceedings for MASCOTS 2007. The symposium scope includes, but is not limited to Modeling, Measurement and Simulation Methodologies for Computer Systems and Networks, as well as Performance Studies of:

- Pervasive Computing Environments
- Computer Architecture
- Parallel and Distributed Systems
- Real-Time and Multimedia Systems
- Internetworking Protocols
- Wireless and Mobile Networking and Computing
- Broadband & Telecommunication Networks and Software
- Web-Based Systems,
- Middleware

Related areas such as Workload Characterization and Generation, Discrete Event Simulation Methodology and Tools, and Parallel / Distributed Simulation, are also within the scope of the conference. Paper length and formatting requirements are provided in the symposium web site.
